**SnugDock – Antibody/Antigen Docking**

### Conformational Sampling
- Antibody-Antigen Orientation
- Heavy-Light Chain Orientation
- All 6 CDRs

### Induced Fit
*SnugDock* with Ensembles of Antibody and Antigen Conformations as Starting Point Optimizes Docking

Top 10 *SnugDock* models aligned to heavy chain framework region with spectrum coloring (*blue, blue, green, green, yellow, orange*).

Modeling and docking of antibody structures with Rosetta.
